JOHN RHE M. POBLACION

BACKEND DEVELOPER INTERN

Iloilo City, Philippines | johnrhe.poblacion@gmail.com | 09270879323 | github.com/Xeph19 | linkedin.com/in/john-rhe-poblacion

PROFESSIONAL SUMMARY

Information Technology student seeking a Backend Developer Internship, with hands-on experience developing database-driven applications, RESTful services, and backend workflows. Skilled in Node.js, Express.js, and PostgreSQL, with additional knowledge of PHP and Laravel. Experienced in collaborative full-stack development and AI-integrated projects.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, Java

Framework & Runtime: Laravel, Node.js, Express.js, Django

Databases: PostgreSQL, MySQL, SQLite, Supabase

Cloud & Developer Tools: AWS (EC2, S3, IAM, VPC), Git, GitHub, Vercel, Render, VS Code

Additional: React, Tailwind CSS, Retrieval-Augmented Generation (RAG), Figma

EDUCATION

Western Institute of Technology | Bachelor of Science in Information Technology | Iloilo City, Philippines

Expected Graduation: April 2027 | Relevant Coursework: Database Systems, Data Structures & Algorithms, Object-Oriented Programming, Information Security, Cloud Architecture

TECHNICAL PROJECTS

MyWay — An AI Assessment For Career Path

Full-stack Developer | PostgreSQL, Express, React, Node.js | Aug 2024 – Oct 2026 | https://myway-app-delta.vercel.app

- Independently developed the application's frontend, backend services, and PostgreSQL database architecture, implementing career assessment workflows, IT specialization mapping, and student progress tracking.
- Integrated DeepSeek APIs, vector embeddings, and curated university curricula into a RAG workflow for personalized learning roadmaps.
- Implemented RIASEC- and SFIA-based career mapping logic; supported structured evaluation involving 117 students and 6 IT industry professionals.

PSITS Official Website

Backend Developer | PostgreSQL, Express, React, Node.js | Mar 2026 – Aug 2026 | https://witpsits-webapp.vercel.app

- Developed RESTful API endpoints using Express.js and PostgreSQL to manage organizational announcements, events, and website content with CRUD operations and validation.

PSITS Digital Attendance Slip

Backend Developer | PostgreSQL, Express, React, Node.js | Jul 2026 – Aug 2026 | https://witpsits-attendace-portal.vercel.app

- Developed backend functionality for digital attendance recording, centralized records, and data retrieval to support student event management.

Prepaid Electricity Vending & Monitoring System

Embedded & Backend Developer | ESP32-S3, ESP-IDF (C), LVGL, Express.js, Supabase | Nov 2026 – Present

- Developed a 7-inch ESP32-S3 touchscreen kiosk for prepaid electricity management with credit top-ups, simulated QR payments, and outlet controls.
- Built Express.js and Supabase services for transaction records, energy readings, protected admin APIs, and device synchronization with offline recovery.

DEVELOPMENT EXPERIENCE

Canopy Developer — Departmental Application Development Team | Web Developer | Jul 2025 – Present

- Develop and maintain departmental web applications, collaborating with student developers on requirements analysis, feature implementation, testing, and deployment.

COURSES & TECHNICAL TRAINING

Laravel From Scratch — Laracasts (2026) | Introduction to Express.js — Simplilearn (2026)

Programming Fundamentals — Simplilearn (2026) | AWS Networking Zero to Hero — Udemy (2026)

Python and Machine Learning coursework — Kaggle (2025) | Python for Data Science & AI — IBM (2025)

LEADERSHIP & ACTIVITIES

AWS Student User Group Philippines — Executive Secretary | Sep 2026 – Present

PSITS — Business Manager & Assistant Secretary (Jul 2024 – Aug 2026); Program Committee Chairperson (Sep 2025 – Aug 2026)
